ZIONVERSE

The Journey So Far!

Zionverse started with our vision of the future of the internet and our take on the vast possibilities brought by Web3. We have poured our heart and soul into it. It is overwhelming to see the positive response from the community and supporters on the same, every day. To provide a chance to those members to chime in and be part of our vision of a Metaverse 'from India and for India', we crafted "The Lakshmi NFT".

The Lakshmi NFT was the earliest and continues to be the most prominent NFT drop by Zionverse. The ownership of Lakshmi NFT offered multiple benefits including but not limited to exquisite 3D models, APY ranging from 18% to 108%, access to a vibrant community, and an opportunity to earn rewards up to 1000 USDC by playing Vijayi Dash.

With the drop of Lakshmi NFT, our team has been working diligently to make these promises a reality and we are happy to announce that the wait is finally over!

Presenting the exclusive launch of the Vijayi Dash for Lakshmi NFT owners and a 7-day event for them to be able to earn USDC rewards.

WHAT IS VIJAYI DASH?

- ## Game Summary

Vijayi Dash is an Indian-culture-inspired casual 3D obstacle course game precisely designed for our community. The goal of this game is pretty simple: survive against the obstacles and reach the finish line in the quickest time possible. So, get ready to dive into a series of exciting challenges and obstacles, and overcome everything to win!

- ## Game Mode - Race Against Time

The game will be played in Time Mode. This means that you will be pitched against the clock. Time for each completed run through the course will be recorded and then converted to points(explained below). Your goal is to try to outdo your best performance and keep accruing more points until the event ends.

POINT SYSTEM

We will be converting the player's time to points and each such run will add to the player's overall points. The conversions will be done as shown below :

1. The two rules of thumb are :
    a. The Players need to finish the entire course to get their time recorded.
    b. The Players will need to have a time better than the qualification time to be rewarded higher points.

Formula:

1. If you are ahead of qualification time - Base value + X for every Y second less than the qualification time.
   Where
   - Base value = base amount of points rewarded for being within the qualification time
   - X = reward for every Y seconds from the qualification time.

2. If you take more than qualification time to complete the level - You will receive 1 point.

For example,

1. For example,
    a. Let's say the qualification time is 5 mins(300 secs)
    b. the base value is 50,
    c. X = 1
    d. Y = 1sec

- So, if there were two users with the respective times
  a. User 1 = 230 sec => 300 - 230 = + 70 secs
  b. User 2 = 250 sec => 300 - 250 = + 50 secs
  c. User 3 = 350 sec => More than 300 secs
  d. Now their points will be as follows : Base + X(Y)
     i. User 1 = 50 + 1(70) = 120 points
     ii. User 2 = 50 + 1(50) = 100 points
     iii. User 3 = 1 point

Note: The numbers shown above are just for explanation purposes.

LEADERBOARD

The points shown above will be used to calculate a leaderboard that visualizes your performance against the other players in Vijayi Dash (i.e. Other Laxmi NFT owners) Based on your Rank on the leaderboard, you will receive USDC rewards at the end of the event.

The Reward distribution here has been adjusted with respect to the payouts done with Vishwaas NFT:

1. Reward Distribution

Rank	Rewards (in USDC)
1	950
2	550
3	350
4 - 11	250
12 - 122	200
123 - 344	150
345 - 677	100
678 - 1676	50
1677 - 2787	25
2788 - 5555	-

Note: The rewards for 2788 - 5555 was 50 USDC has already been paid out through Vishwaas NFT.

How will we manage a tie in the leaderboard

In case of a tie, the parties involved in the conflict will be put one after another and the next best-timed players will be adjusted accordingly.

For example, If player A and player B are tied at rank #5

- Player A and B will both be at #5
- There will be no #6
- Next-best timed player will be #7

The reward calculation for the same scenario will be done as shown below :

- Reward = Total reward between the positions / number of people in conflict
- Reward = (250 + 250) / 2 (average of prize money for position 5 and 6)
- Both Player A and Player B will get 250 USDC respectively.

Another example with a tie between 3 players

- Consider Player A, Player B, and Player C occupy rank #10
- The rank adjustments will be as follows
- Player A, B and C = rank #10,
- Next-best timed player will be #13

The reward calculation for the same scenario will be done as shown below :

- Reward = Total reward between positions / number of people in conflict
- Reward = (250 + 250 + 200) / 3 (average of Prize money for position 10, 11 and 12)
- Player A, B and C will get 233 USDC respectively.

Note : Rank #12 falls under a different bracket. Hence, had a different reward value.

Game Play - Event Details

The event will commence with the launch of Vijayi Dash and will continue for a total of 7 days. In this time period, all Lakshmi NFT owners will be able to download and play the game to be able to earn rewards up to 1000 USDC.
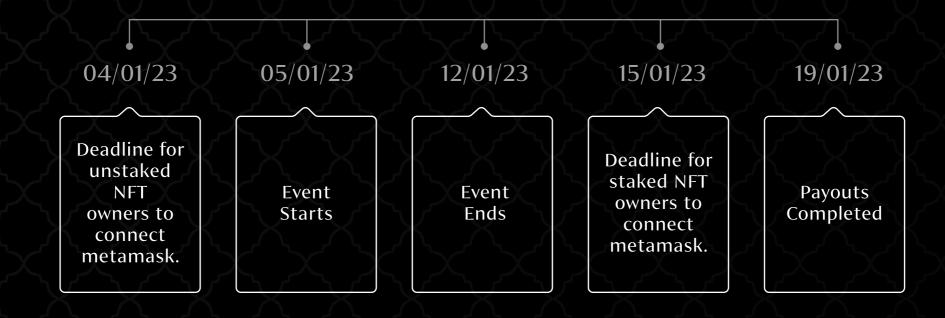

Important Points:

Event starts : 5th January 6 pm IST
Event Ends : 12th January 6 pm IST

Duration: 7 Days
Where: Zionverse App

VIJAY DASH EVENT TIMELINE
(Januray 2023)

04/01/23	05/01/23	12/01/23	15/01/23	19/01/23
Deadline for unstaked NFT owners to connect metamask.	Event Starts	Event Ends	Deadline for staked NFT owners to connect metamask.	Payouts Completed

Requirements

Lakshmi NFT

· Each player will need to own at least one Lakshmi NFT to be able to participate in this event.

· Unstaked Lakshmi NFT: Users who purchased the Lakshmi NFT from a secondary market or who have unstaked their NFT can still participate by linking their Zionverse account with the Metamask wallet which contains the Lakshmi NFT. Users will have to do this 24 hours before the event starts and hold the NFT for the duration of the event.

· **Deadline : 4th Jan 6 pm IST**

Payout Of Rewards

Players will be required to have a Metamask wallet. Follow this step-step guide on how to setup a Metamask wallet : LINK

· They will be required to link their Metamask wallets to their Zionverse account to be able to receive USDC rewards earned in this tournament.

· Follow this step-by-step guide on how to connect your Metamask wallet to your Zionverse account: LINK

· The deadline to connect your Metamask wallets is : 15th Jan 6pm IST.

· The payouts for all the game rewards and any additional staking rewards will be done before 19th Jan 6 pm IST.

Android Device

· The Players will also require an Android device to use the Zionverse app which has the Vijayi Dash game integrated within it.

· The Players can download the Zionverse App from the Google play store.

GAMEPLAY RUNS

• Run: An attempt to complete the obstacle course and reach its end is considered a "RUN".

1. Each NFT is considered a unique player. The owners will have a separate Runs balance for each NFT they own.
2. Players will also be able to see the Runs utilization balance and the Rank of each NFT in the leaderboard for the respective NFT.
3. All players will be given 3 Runs per day per NFT for the event duration (7 days).
4. If not used on that particular day, the runs will accumulate until the end of the event after which they become invalid.
   a. The players will get 3 Runs every day and will have a total of 21 Runs on the 7th day if not used.
5. Players will be able to track the available amount of runs inside the Zionverse App.
6. Runs across different NFTs cannot be used fungibly and progress will be tracked at NFT Level.

Note : Each NFT is considered an unique player. The owners will have a separate 'Runs' balance for each NFT they own. And each NFT will yield respective rewards based on its rank on the leaderboard.

GAMEPLAY - OPTIONAL RE-ENTRY
(YOU DON'T PAY UPFRONT FOR RE-ENTRY)

· Re-entry: The players can get extra runs, by borrowing USDC from their potential USDC rewards (which is determined at the end of the event).

1. After players have spent their balance of available runs, they can buy extra Runs to gain more points and improve their time.
2. Each such extra run will cost 1 USDC to players. If you are within the ranks #2788 - #5555, you will be able to get extra runs and try to climb the leaderboard at no extra cost.
3. The players will not have to give any USDC upfront.
4. All borrowed USDC will be deducted from their final reward at the end of event

   · In case after the deduction, the total becomes negative, the players will not owe any fees to us.
   · The only thing to be lost by the player is the potential reward.

RECHARGE COST

Rank	Recharge Cost
1 - 2787	1 USDC
2788 - 5555	Free

Note : Each NFT is considered a unique player. The owners will have a borrow balance for each respective NFT which will be deducted from that particular NFT's potential reward at the end of the event

FAQ'S

◆ ━━ ◆ ━━ ◆

• **I have multiple Lakshmi NFTs. How will the game work for me?**

Each NFT is considered a unique player. The owners will have separate Runs utilization balances for each NFT they own. And each NFT will yield respective rewards based on its rank on the leaderboard. You will be able to switch between these NFTs inside the Zionverse App.

• **I could not play for a few days. Will I lose out on my chance to win?**

All players will be given 3 Runs per day per NFT for the duration of the event (i.e. 7 days). If not utilized on that particular day, they will accumulate instead of being reset. Each NFT owner is guaranteed 21 Runs over the course of these 7 days. The player has to utilize all the runs before the end of the event.

• **How will the payout happen for the amount I win?**

The user will have to connect their Metamask wallets to their Zionverse profiles on the Zionverse Website.
Follow along with these step-by-step tutorials to do the same:
 1. How to create a new Metamask wallet : [Link](#)
 2. How to connect/disconnect your Metamask wallet to your Zionverse ID: [Link](#)
All the payouts will be completed by 19th Jan 6pm IST.

• **Will the game be available to play anytime?**

The user can play the game at any time during the 7-day event, given that they have a positive number of Runs. If not they can choose to purchase more Runs from their potential USDC prizes and continue playing.

• Where I can play the game?

The player can download the Zionverse app from the Google play store. **LINK.**

• What if I am tied with someone of the same rank?

In case of a tie, the parties involved in the conflict will be put one after another and the next best-timed player will be adjusted accordingly. Please refer to the "how we will manage a tie in the leaderboard" section in the litepaper.

• I bought Lakshmi NFT from the secondary market, Will I get a chance to participate in the event?

Yes, All you need to do is link your Zionverse account with the Metamask wallet that has the Lakshmi NFT(s). After successfully linking your NFT you will be able to participate and win!
